Notes to the Condensed Consolidated Interim Financial Statements (continued)

(All amounts in US\$ thousands, except shares and per share data and as otherwise indicated)

1. General information

Adecoagro S.A. (the "Company" or "Adecoagro") is the Group's ultimate parent company and is a société anonyme (stock corporation) organized under the laws of the Grand Duchy of Luxembourg. Adecoagro is a holding company primarily engaged through its operating subsidiaries in agricultural and agro-industrial activities. The Company and its operating subsidiaries are collectively referred to hereinafter as the "Group". These activities are carried out through three major lines of business, namely, Farming; Sugar, Ethanol and Energy and Land Transformation. Farming is further comprised of three reportable segments, which are described in detail in Note 3 to these condensed consolidated interim financial statements.

Adecoagro is a public company listed in the New York Stock Exchange as a foreign registered company under the symbol of AGRO.

These condensed consolidated interim financial statements have been approved for issue by the Board of Directors on August 11, 2017.

2. Financial risk management

Risk management principles and processes

The Group continues to be exposed to several risks arising from financial instruments including price risk, exchange rate risk, interest rate risk, liquidity risk and credit risk. A thorough explanation of the Group's risks and the Group's approach to the identification, assessment and mitigation of risks is included in Note 2 to the annual financial statements. There have been no changes to the Group's exposure and risk management principles and processes since December 31, 2016 and refers readers to the annual financial statements for information.

However, the Group considers that the following tables below provide useful information to understand the Group's interim results for the six month period ended June 30, 2017. These disclosures do not appear in any particular order of potential materiality or probability of occurrence.

The accompanying notes are an integral part of these condensed consolidated interim financial statements.

2. Financial risk management (continued)

- **Exchange rate risk**

The following tables show the Group's net monetary position broken down by various currencies for each functional currency in which the Group operates at June 30, 2017. All amounts are shown in US dollars.

Net monetary position (Liability)/ Asset	June 30, 2017 (unaudited)				
	Functional currency				
	Argentine Peso	Brazilian Reais	Uruguayan Peso	US Dollar	Total
Argentine Peso.....	12,119	-	-	-	12,119
Brazilian Reais.....	-	(108,567)	-	-	(108,567)
US Dollar.....	(96,128)	(415,299)	22,688	69,560	(419,179)
Uruguayan Peso.....	-	-	(860)	-	(860)
Total.....	(84,009)	(523,866)	21,828	69,560	(516,487)

The Group's analysis shown on the tables below is carried out based on the exposure of each functional currency subsidiary against the US dollar. The Group estimated that, other factors being constant, a 10% appreciation of the US dollar against the respective functional currencies for the period ended June 30, 2017 would have increased the Group's Profit Before Income Tax for the period. A 10% depreciation of the US dollar against the functional currencies would have an equal and opposite effect on the income statement. A portion of this effect would be recognized as other comprehensive income since a portion of the Company's borrowings was used as cash flow hedge of the foreign exchange rate risk of a portion of its highly probable future sales in US dollars (see Hedge Accounting - Cash Flow Hedge below for details).

Net monetary position	June 30, 2017 (unaudited)				
	Functional currency				
	Argentine Peso	Brazilian Reais	Uruguayan Peso	US Dollar	Total

(Decrease) or increase in Profit Before Income Tax ...	(9,613)	(41,530)	2,269	-	(48,874)

Hedge Accounting - Cash Flow Hedge

Effective July 1, 2013, the Group formally documented and designated cash flow hedging relationships to hedge the foreign exchange rate risk of a portion of its highly probable future sales in US dollars using a portion of its borrowings denominated in US dollars, currency forwards and foreign currency floating-to-fixed interest rate swaps.

The Group expects that the cash flows will occur and affect profit or loss between 2017 and 2020.

For the period ended June 30, 2017, a total amount before income tax of US\$ 2,508 loss was recognized in other comprehensive income and an amount of US\$ 3,320 loss was reclassified from equity to profit or loss within "Financial results, net".

The accompanying notes are an integral part of these condensed consolidated interim financial statements.

Finance leases	124	-	-	124
Total borrowings at June 30, 2017 ...	143,192	623,097	27,990	794,279

At June 30, 2017, if interest rates on floating-rate borrowings had been 1% higher (or lower) with all other variables held constant, **Profit Before Income Tax** for the period would decrease as follows:

Rate per currency denomination	June 30, 2017 (unaudited)			Total

3. Segment information

IFRS 8 “Operating Segments” requires an entity to report financial and descriptive information about its reportable segments, which are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available that is evaluated regularly by the chief operating decision maker (“CODM”) in deciding how to allocate resources and in assessing performance. The CODM evaluates the business based on the differences in the nature of its operations, products and services. The amount reported for each segment item is the measure reported to the CODM for these purposes.

The Group operates in three major lines of business, namely, Farming; Sugar, Ethanol and Energy; and Land Transformation.

- The Group’s **‘Farming’** line of business is further comprised of three reportable segments:
 - The Group’s **‘Crops’** Segment consists of planting, harvesting and sale of grains, oilseeds and fibers (including wheat, corn, soybeans, cotton and sunflowers, among others), and to a lesser extent the provision of grain warehousing/conditioning, handling and drying services to third parties, and the purchase and sale of crops produced by third parties crops. Each underlying crop in the Crops segment does not represent a separate operating segment. Management seeks to maximize the use of the land through the cultivation of one or more type of crops. Types and surface amount of crops cultivated may vary from harvest year to harvest year depending on several factors, some of them out of the Group’s control. Management is focused on the long-term performance of the productive land, and to that extent, the performance is assessed considering the aggregated combination, if any, of crops planted in the land. A single manager is responsible for the management of operating activity of all crops rather than for each individual crop.
 - The Group’s **‘Rice’** Segment consists of planting, harvesting, processing and marketing of rice;
 - The Group’s **‘Dairy’** Segment consists of the production and sale of raw milk;
 - The Group’s **‘All Other Segments’** column consists of the aggregation of the remaining non-reportable operating segments, which do not meet the quantitative thresholds for disclosure and for which the Group’s management does not consider them to be significance Coffee and Cattle.
- The Group’s **‘Sugar, Ethanol and Energy’** Segment consists of cultivating sugarcane which is processed in owned sugar mills, transformed into ethanol, sugar and electricity and marketed;
- The Group’s **‘Land Transformation’** Segment comprises the (i) identification and acquisition of underdeveloped and undermanaged farmland businesses; and (ii) realization of value through the strategic disposition of assets (generating profits).

The measurement principles for the Group’s segment reporting structure are based on the IFRS principles adopted in the interim financial statements.

Total segment assets and liabilities are measured in a manner consistent with that of the condensed consolidated interim financial statements. These assets and liabilities are allocated based on the operations of the segment and the physical location of the asset. The Group’s investment in the joint venture CHS S.A. is allocated to the ‘Crops’ segment.

The following table presents information with respect to the Group’s reportable segments. Certain other activities of a holding function nature not allocable to the segments are disclosed in the column **‘Corporate’**.

The accompanying notes are an integral part of these condensed consolidated interim financial statements.

15. Financial instruments

As of June 30, 2017, the financial instruments recognized at fair value on the statement of financial position comprise derivative financial instruments.

In the case of Level 1, valuation is based on unadjusted quoted prices in active markets for identical financial assets that the Group can refer to at the date of the statement of financial position. A market is deemed active if transactions take place with sufficient frequency and in sufficient quantity for price information to be available on an ongoing basis. Since a quoted price in an active market is the most reliable indicator of fair value, this should always be used if available. The financial instruments the Group has allocated to this level mainly comprise crop futures and options traded on the stock market. In the case of securities, the Group allocates them to this level when either a stock market price is available or prices are provided by a price quotation on the basis of actual market transactions.

Derivatives not traded on the stock market allocated to Level 2 are valued using models based on observable market data. For this, the Group uses inputs directly or indirectly observable in the market, other than quoted prices. If the financial instrument concerned has a fixed contract period, the inputs used for valuation must be observable for the whole of this period. The financial instruments the Group has allocated to this level mainly comprise interest-rate swaps and foreign-currency interest-rate swaps.

In the case of Level 3, the Group uses valuation techniques not based on inputs observable in the market. This is only permissible insofar as no observable market data are available. The inputs used reflect the Group's assumptions regarding the factors, which market players would consider in their pricing. The Group uses the best available information for this, including internal company data. The Group does not have financial instruments allocated to this level for any of the periods presented.

The following tables present the Group's financial assets and financial liabilities that are measured at fair value as of June 30, 2017 and their allocation to the fair value hierarchy:

	2017		
	Level 1	Level 2	Total

15. Financial instruments (continued)

When no quoted prices in an active market are available, fair values (particularly with derivatives) are based on recognized valuation methods. The Group uses a range of valuation models for this purpose, details of which may be obtained from the following table:

Class	Pricing Method	Parameters	Pricing Model	Level	Total
Futures	Quoted price	-	-	1	(3,608)
Options	Quoted price	-	-	1	5,996

In the ordinary course of business, the Group is subject to certain contingent liabilities with respect to existing or potential claims, lawsuits and other proceedings, including those involving tax, labor and social security, administrative and civil and other matters. The Group accrues liabilities when it is probable that future costs will be incurred and it can reasonably estimate them. The Group bases its accruals on up-to-date developments, estimates of the outcomes of the matters and legal counsel experience in contesting, litigating and settling matters. As the scope of the liabilities becomes better defined or more information is available, the Group may be required to change its estimates of future costs, which could have a material effect on its results of operations and financial condition or liquidity. There have been no material changes to claimed amounts and current proceedings since December 31, 2016.

26. Basis of preparation and presentation

The information presented in the accompanying condensed consolidated interim financial statements (“interim financial statements”) as of June 30, 2017 and for the six-month periods ended June 30, 2017 and 2016 is unaudited and in the opinion of management reflect all adjustments necessary to present fairly the financial position of the Group as of June 30, 2017, results of operations and cash flows for the six-month periods ended June 30, 2017 and 2016. All such adjustments are of a normal recurring nature. In preparing these accompanying interim financial statements, management has made certain estimates and assumptions that affect reported amounts in the financial statements and disclosures of contingencies. Actual results may differ from those estimates. The results for interim periods are not necessarily indicative of annual results.

These interim financial statements have been prepared in accordance with IAS 34, ‘Interim financial reporting’ and they should be read in conjunction with the annual financial statements for the year ended December 31, 2016, which have been prepared in accordance with IFRSs.

In order to facilitate the understanding of our Consolidated Financial Statements, we have changed the format of the presentation of our income statement. During the fourth quarter of 2016, we aggregate our sales in a single line item titled “Sales of goods and services rendered”. Likewise, the corresponding cost has also been aggregated and presented as a single line item titled “Cost of goods sold and services rendered”. The breakdown of sales is now included in Note 4 to the Consolidated Financial Statements. The comparative figures have been retroactively changed accordingly.

The accounting policies adopted in the preparation of the interim financial statements are consistent with those followed in the preparation of the Group’s annual consolidated financial statements for the year ended December 31, 2016.

A complete list of standards, amendments and interpretations to existing standards published but not yet effective for the Group is described in Note 32.1 to the annual financial statements.

Below is a description of the standards, amendments and interpretations issued by the IASB to existing standards that have been issued and are mandatory for the Group with closer adoption:

In May 2014, the IASB issued IFRS 15, “Revenue from contracts with customers”, which deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity’s contracts with customers. Revenue is recognized when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 ‘Revenue’ and IAS 11 ‘Construction contracts’ and related interpretations. The standard is effective for annual periods beginning on or after January 1, 2018 and earlier application is permitted.

In July 2014 the IASB published the final version of IFRS 9 Financial Instrument which replaces earlier versions of IFRS 9 and completes the IASB’s project to replace IAS 39 Financial Instruments: Recognition and Measurement. It includes requirements on the classification and measurement of financial assets and liabilities, as well as an expected credit losses model that replaces the current incurred loss impairment model. The standard is effective for accounting periods beginning on or after January 1, 2018. Early adoption is permitted.

In January 2016, the IASB finished its long-standing project on lease accounting and published IFRS 16, ‘Leases’, which replaces the current guidance in IAS 17. This will require far-reaching changes in accounting by lessees in particular. The standard applies to annual periods beginning on or after 1 January 2019, with earlier application permitted if IFRS 15, ‘Revenue from Contracts with Customers’, is also applied.

We are currently evaluating the impact of our pending adoption of the new standard on our consolidated financial statements.

The accompanying notes are an integral part of these condensed consolidated interim financial statements.

26. Basis of preparation and presentation (continued)

Seasonality of operations

The Group's business activities are inherently seasonal. The Group generally harvest and sell its grains (corn, soybean, rice and sunflower) between February and June, with the exception of wheat, which is harvested from December to January. Coffee and cotton are different in that while both are typically harvested from June to August, they require a conditioning process which takes about two to three months. Sales in other business segments, such as in Dairy business segments, tend to be more stable. However, the sale of milk is generally higher during the fourth quarter, when the weather is warmer and pasture conditions are more favorable. The sugarcane harvesting period typically begins April/May and ends in November/December. This creates fluctuations in sugar and ethanol inventory, usually peaking in December to cover sales between crop harvests (i.e., January through April). As a result of the above factors, there may be significant variations in the results of operations from one quarter to another, as planting activities may be more concentrated in one quarter whereas harvesting activities may be more concentrated in another quarter. In addition, quarterly results may vary as a result of the effects of fluctuations in commodities prices, production yields and costs on the determination of initial recognition and changes in fair value of biological assets and agricultural produce.

27. Critical accounting estimates and judgments

The Group's critical accounting policies are also consistent with those of the audited annual financial statements for the year ended December 31, 2016 described in Note 32.

The accompanying notes are an integral part of these condensed consolidated interim financial statements.
